Work Experience:

- Union Bank (temp/contract) Fraud Analyst - November, 2017 - Present
    - Worked in a multi-functional team and assisted with company goals.
    - Wrote Javascript application for assisting with notating accounts. Tested application amongst peers and found that it improved consistency, increased speed, and prevented mistakes for each user. https://amcnulty.github.io/NoteHelperWeb/
- Front end Web Developer (contractor) GradSpecs LLC - January, 2015 - May, 2017
    - Translated mock-up designs to workable code using HTML5, CSS3, Javascript, JQuery, Bootstrap, AngularJS.
    - Created Front-End code that is cross browser compatible and mobile responsive.
    - Followed current web standards for UI/UX design to make clean front end applications.

- - Mobile application development using Cordova/PhoneGap to build hybrid apps.
    - Followed agile development methodologies during software development life cycle.
  - Freelance Web Developer (Sole Proprietor) - 2015 - present
    - Ability to understand client's needs and translate them into a range of software solutions. This included optional upgrades and maintenance options for recurring revenue.
    - Designed, built and maintain website for commercial business www.contractorsgarage.net
    - Estimated time frames for the client to manage development time under specific deadlines.
    - Created a custom design for client's website to highlight key points of their business.
  - CEO at Stars and Stripes General Contracting - February, 2016 - May, 2017
    - Started construction/landscaping business from ground up as a proof of concept model.
    - Turned company into a profitable business by overcoming start-up costs within first four months of operation.
    - Created company custom website using latest core web technologies which was used to advertise, build the company brand, work as a point of contact, and generate bids and leads for the business. https://amcnulty.github.io/SSGC/
    - Personally ran the company's finances, marketing strategy, customer acquisition and retention, website, employee hiring/training, and operations.
  - NBH Bank, Bank Midwest Teller - October, 2013 - April, 2015
    - Created a custom Java RPG for a fun way to track teller sales and generate friendly competition. The game was very well received and offered an alternative way to track referrals in a unique way.
    - Attention to detail while working resulting in zero cash differences during entire employment.
  - Von Maur - Professional pianist - July, 2013 - April, 2015
    - Analytical thought and memorization allowed me two hours of classical music committed to memory.
    - Highly self motivated - 100% self taught with no formal training.

Objective:

To obtain a web development position at an enterprise level company and use my educational qualifications gained at UCSD Extension along with my current experience as a freelance web developer.

Education/Training:

University of California San Diego Extension - Certificate of completion 2018

- Full Stack Developer Coding Bootcamp for Web Technologies
  - Scored A+ on all assignments and projects.
  - Helped coach/tutor other students in the class.
